Account deletion

2026-11-08

This page explains how users of the NephroGo app can delete their NephroGo account and the data associated with it, which data is deleted, and which data may be kept and for how long.

How to delete your account in the NephroGo app

1. Open the NephroGo app and sign in to the account you want to delete.
2. Open the **Account** tab.
3. Tap **Delete account** and confirm.

The account is deleted immediately and you are signed out of the app.

How to request deletion without the app

If you no longer have the NephroGo app installed, send an e-mail to info@nephrogo.com from the e-mail address of your NephroGo account, with the subject "Delete my NephroGo account". We will delete the account within 30 days and confirm it by e-mail.

What data is deleted?

Deleting the account permanently deletes from our servers:

- your account and sign-in details, including the login stored with our login service provider Firebase Authentication (e-mail, Google or Apple sign-in);
- your profile: gender, date of birth, height, weight, chronic kidney disease, dialysis and diabetes information;
- all data you entered in the app: meals and food intake, health indicators (blood pressure, body weight, urine output, swelling, well-being, appetite, shortness of breath, blood glucose), dialysis records and any other diary entries.

Deleted data cannot be restored.

What data is kept and for how long?

We do not keep any of the data listed above after the account is deleted. Pseudonymous usage, performance and crash data that is not linked to your name or e-mail address may remain with our analytics and monitoring service providers (Firebase Analytics, Firebase Crashlytics, Datadog, Sentry) until it expires under their retention periods, at most 12 months.

Questions

For more information on how NephroGo processes personal data, see the NephroGo Privacy policy at www.nephrogo.com/documents/en/privacy-policy.pdf, or contact us at info@nephrogo.com.
